

Introducing DeepWell Liquidity Management for FX

DeepWell Liquidity Management provides a tailored service to customers facing the challenges of constantly evolving markets brought about by regulatory advances and their own changing business priorities.

DeepWell is a financial services intermediary active in both OTC and exchange-listed products, and provides access to enhanced liquidity pools across a wide range of asset classes. Its global institutional customer base includes hedge funds, asset managers, central and private banks.

Key features and benefits of DeepWell's FX offering include:

- **Unrivalled market liquidity** from more than 20 banks and a growing number of non-bank market making entities
- All trades are cleared through a prime brokerage model ensuring **full anonymity for all customers** regardless of deal type
- A **full range of FX products** – spot, forward, non-deliverable forward, FX options and exotic FX options – across all major and emerging market currencies
- A full range of expiry dates from **overnight to 2 years** in most currencies
- Brokerage **fees incorporated into prices**

The DeepWell team provides:

- **Superior price and liquidity provision** through global relationships with multiple liquidity providers (banks and other financial institutions)
- Unprecedented experience enabling **best execution**
- **Long- and short-term trade ideas** based on macro views and in-house analytics
- **Aggregated market commentary** and colour from multiple sources
- The support of Tradition's unrivalled **compliance and regulatory expertise**
